PH-SJ028-1 cont

| 1 | purchased with public funds with the sole intent |
|----|--|
| 2 | that the land be protected in its natural state |
| 3 | for all time. To run a train through it would be |
| 4 | a violation of public trust. |
| 5 | I've seen much of Coe. I know that it's |
| 6 | an extraordinary place. A place where there's |
| 7 | elk and deer and raccoons, foxes, coyotes, |
| 8 | mountain lions. There's woodlands of oak forest, |
| 9 | fury falcons, golden eagles, rugged ridges, |
| 10 | flower field meadows, and waterfalls; all |
| 11 | precious things that they just don't make any |
| 12 | more. |
| 13 | But simply, the value of the land |
| 14 | protected in Coe Park to the people of the State |
| 15 | of California is far greater than any value that |
| 16 | the high-speed rail will have. And if the |
| 17 | high-speed rail what would I do if the |
| 18 | high-speed rail goes through Coe Park? It's the |
| 19 | same thing you should do; it's the same thing |
| 20 | everybody in the State of California should do; |
| 21 | that is, they should cry. |
| 22 | MR. PETRILLO: Excuse me. One question. |
| 23 | One of the alternatives is Don Edwards. Is your |
| 24 | feelings about that the same, about Don Edwards? |
| 25 | BARRY BRECKLING: I don't know about Don |

BELL & MYERS, CSR, INC.

| | 1 | Edwards. I'm only concerned with Henry Coe. | |
|-----------|----|---|-------------|
| | 2 | MR. PETRILLO: Michael Sanchez followed by | |
| | 3 | Charles Luckhardt. | |
| PH-SJ029 | 4 | MICHAEL SANCHEZ: Good afternoon, Chair | |
| | 5 | and members. My name is Michael Sanchez. I am a | : |
| | 6 | native of Santa Clara County, and I am a member | |
| | 7 | of the Sierra Club. | PH-SJ029-1 |
| 1 | 8 | I strongly oppose any route through Henry | |
| | 9 | Willard Coe and the Orestimba Wilderness due to | |
| | 10 | its short range and long-term impact. It also | |
| | 11 | sets a dangerous precedence to run a train | |
| | 12 | through a wilderness area that's protected by | |
| | 13 | law. | |
| | 14 | I also have ridden Amtrak in the past. | |
| | 15 | And I'm one of those overpaid high-tech workers | |
| | 16 | in this valley. And I have to really consider | PH-SJ029-2 |
| | 17 | what it costs me to ride a train from San Jose to | 111-33029-2 |
| | 18 | Sacramento or even from San Jose to Seattle. And | |
| | 19 | I really think the numbers and the return on | |
| | 20 | investment are a little optimistic. And I urge | |
| | 21 | you to reconsider those numbers and study them | |
| | 22 | further. Thank you very much. | |
| | 23 | MR. PETRILLO: Thank you. Charles | |
| DII CIA2A | 24 | Luckhardt followed by Samuel Downs. | |
| PH-SJ030 | 25 | CHARLES LUCKHARDT: My name is Charles | PH-SJ030-1 |

| | · · · · · · · · · · · · · · · · · · · | |
|----|---|--------------------|
| 1 | Luckhardt. Our family owns a ranch and has owned | |
| 2 | it since 1939. And the route and the ranch | DII (2)020 1 |
| 3 | would be bisected by the northern-most route | PH-SJ030-1 cont |
| 4 | you're studying that goes through the San Antoine | |
| 5 | Valley. We treasure the peace and quiet and the | |
| 6 | animals; and others have talked about them. So | |
| 7 | let me give you just a little piece for you EIR | |
| 8 | folks. | |
| 9 | I wonder if they've thought about what | |
| 10 | would happen if there was a train derailment or | |
| 11 | wreck out in the wilderness? How are they going | |
| 12 | to get help out there? There's no police | PH-SJ030-2 |
| 13 | coverage. There's very little fire coverage. | |
| 14 | What if there's a wild fire? The current | |
| 15 | procedure is in this area is to let it burn | |
| 16 | and hope it burns out. And I'm sure during that | |
| 17 | period, the trains would have to stop. | |
| 18 | One thing that makes fighting a wild fire | |
| 19 | more difficult with the right of way there is | |
| 20 | that I'm sure you will have it fenced with high | |
| 21 | impermeable fences; and in fighting a wild fire, | |
| 22 | the jeep roads and ridges are important for the | |
| 23 | tractors and fire equipment to get to the fire | |
| 24 | and isolate it. | - |
| 25 | Another concern I have is game crossings | PH-SJ030-3 |
| | | |

| | 1 | and access to the divided parts of our land. I | |
|----------|------|--|------------|
| | 2 | suspect you're not going to put nearly enough, | |
| | 3 | from our perspective, so that we can get to each | PH-SJ030-3 |
| • | 4 | side of our ranch and to the county road that is | |
| | 5 | nearby. | |
| | 6 | Finally, water. We have just seasonal | |
| | 7 | creeks back there, and water where we are is a | |
| 1 | 8 | problem. There's one really good spring, but | |
| | 9 | it's near where you're going to tunnel. And I | |
| | 10 | know when you tunnel, it's like a mine, the water | |
| | 11 | comes down there. We had an earthquake back in | |
| | 12 | the '60s and one spring stopped and another one $^{\circ}$ | |
| | 13 | started. And I would hate to have our spring run | - |
| | 14 | down at your tunnels just as much as you would | |
| | 15 | hate to have it there. Thank you. | |
| | 16 | MR. PETRILLO: Thank you very much. | |
| | 17 | Samuel Downs followed by Brian Schmidt. | |
| PH-SJ031 | 18 . | SAMUEL DOWNS: Hi. I would just like to | |
| | 19 | relate my feelings on why I don't support the | |
| | 20 | Henry Coe planned route. | PH-SJ031-1 |
| | 21 | I first visited the park when I was a Boy | |
| | 22 | Scout many years ago. And since I've returned | |
| | 23 | almost every year to go backpacking. One of the | |
| | 24 | things I do enjoy most about the park is the | |
| | 25 | quiet when you are out in the back country. And, | |

| | 1 | granted, I haven't explored the northern regions | |
|----------|----|---|-------------------|
| | 2 | where the planned route goes through, I've been | |
| | 3 | close to there. And I don't think once the | PH-SJ031- cont |
| | 4 | construction begins that there will be much quiet | |
| | 5 | out there any more. | |
| | 6 | I would like to read a quote from the | |
| | 7 | monument placed in the park shortly after its | |
| | 8 | donation by Sada Coe. | |
| | 9 | "May these white hills bring peace to the | 1 |
| | 10 | souls of those who are receiving it." That's it. | |
| | 11 | MR. PETRILLO: Thank you very much. Brian | |
| | 12 | Schmidt followed by John Wilkinson. | |
| PH-SJ032 | 13 | BRIAN SCHMIDT: Good afternoon. My name | |
| | 14 | to Brian Schmidt. I am the Santa Clara County | |
| | 15 | Legislative Advocate for the Committee for Green | |
| | 16 | Foothills. The Committee for Green Foothills is | |
| | 17 | dedicated to open space and natural resource | |
| | 18 | protection in San Mateo and Santa Clara Counties. | |
| | 19 | We have over a thousand members in those two | PH-SJ032- |
| | 20 | counties and elsewhere in the state. | |
| | 21 | I have come to comment about the failure | |
| | 22 | to include the Altamont Pass route as one of the | |
| | 23 | alternatives to be considered in the range of | |
| | 24 | alternatives. We support consideration to the | |
| | 25 | Altamont Pass route as one of the alternatives to | i |

PH-SJ032-1

cont

1 be analyzed in the draft EIR. At this time The Committee for Green Foothills is not taking a position on the best alignment but rather than the EIR needs to provide the further analysis required to 5 determine what the best alignment actually is. Some proponents of the southern routes have suggested there will be environmental 8 9 impacts that will result from the Altamont Pass 10 alignment. Now, if the Altamont Pass had been 11 included in the draft EIR, we would be in a 12 position to analyze that and try to understand 13 which alignment has the best environmental output. But that isn't the case we have in front 14 15 of us. 16 There appears instead to be a disconnect where southern route proponents are saying 17 18 Altamont Pass route has environmental impact, but 19 don't analyze them; don't go and find out what 20 they are. That disconnect is not a good way to 21 do environmental planning. 22 The Committee for Green Foothills asks that the draft EIR be revised and recirculated to 23 include the Altamont Pass route. A failure to do 24 so can render this CEQA process legally 25

BELL & MYERS, CSR, INC.

| | 1 | inadequate. | |
|----------|----|--|------------|
| | 2 | And I would be happy to answer any | PH-SJ032-1 |
| | 3 | questions. | cont |
| | 4 | MR. PETRILLO: I want to point out that | 1 |
| | 5 | the Altamont Pass route was excluded, not for | |
| | 6 | environmental reasons, but for operational | |
| | 7 | reasons in the scope of the study. So those are | |
| í | 8 | really the issues that have been put in the EIR | |
| | 9 | and to which we are looking for comments about | |
| | 10 | the validity of that determination. | |
| | 11 | BRIAN SCHMIDT: Thank you. I understand | |
| | 12 | that, and I think that's been addressed by other | |
| | 13 | comments. | |
| | 14 | MR. PETRILLO: Okay. John Wilkinson | |
| | 15 | followed by Bettiva Settifman. | |
| PH-SJ033 | 16 | JOHN WILKINSON: Yes. My name is John | |
| | 17 | Wilkinson. I'm a member of Sierra Club, and I | |
| | 18 | live in San Jose. I would like to thank the | |
| | 19 | Authority for having a public hearing in my home | PH-SJ033-1 |
| | 20 | town, San Jose. | |
| | 21 | The Sierra Club is not an advocate for | |
| - | 22 | Altamont Pass, but we do think it was excluded | |
| | 23 | from the process in 1999 for reasons which are | : : |
| | 24 | inadequate. | |
| | 25 | I have heard a lot of opinions expressed | |
| | | | |

| | | _ |
|----|---|------------|
| 1 | here today which seem to come from some knowledge | |
| 2 | that I don't have. I only know what's in the | PH-SJ033-1 |
| 3 | EIR. And according to the EIR, the Altamont | cont |
| 4 | route was rejected because of ridership studies | |
| 5 | that show it would be 5.5 percent less ridership | |
| 6 | than a southern alignment. This is not a very | |
| 7 | large percentage. For a complicated forecast 16 | |
| 8 | years from the future, it seems to be within the | |
| 9 | margin of error. But even if the figure is | |
| 10 | accepted, it is not sufficient from my | |
| 11 | understanding of CEQA guidelines for elimination | |
| 12 | of a route. | |
| 13 | CEQA guidelines provide that even routes | |
| 14 | which might impair attainment of project goals | |
| 15 | should be included if they could eliminate severe | |
| 16 | environmental impacts. | |
| 17 | On the other hand, two routes are | |
| 18 | included which I believe to be impossible. These | |
| 19 | are the routes that run through the Orestimba | PH-SJ033-2 |
| 20 | Wilderness and Henry Coe State Park. I believe | |
| 21 | these routes are impossible because of the moral | |
| 22 | and legal barriers to their adoption are | |
| 23 | insurmountable. | |
| 24 | The Wilderness Act provides in a land | |
| 25 | which is designate as a wilderness is so | 1 |

| | 1 | designated forever. This is a promise to future | |
|----------|----|---|------------|
| | 2 | generations that these lands will remain wild | PH-SJ033-2 |
| | 3 | forever. Therefore, to my way of thinking, these | cont |
| | 4 | routes are impossible. | |
| | 5 | The Wilderness Act does not provide that | |
| | 6 | wilderness can be withdrawn. If you run if | |
| | | | |
| 1 | 7 | you want to run trains through the wilderness, | |
| | 8 | you have to repeal the Wilderness Act or amend it | |
| | 9 | to allow trains in the wilderness or amend it to | |
| | 10 | allow wilderness lands to be withdrawn as | |
| | 11 | wilderness designations. | |
| | 12 | MR. PETRILLO: Thank you very much. | |
| | 13 | Bettiva Settifman followed by Georgia Stigall. | |
| PH-SJ034 | 14 | BETTIVA SETTIFMAN: Good afternoon. My | |
| | 15 | name to Bettiva Settifman. I'm a resident of | PH-SJ034-1 |
| | 16 | Santa Cruz. I'm a supporter of high-speed rail. | |
| | 17 | I think I'll keep my comments very brief, since | |
| | 18 | it's late. | |
| | 19 | But I think it would be poor policy to | |
| | 20 | endorse the current draft EIR, because it is a | |
| | 21 | poor document. It does not analyze the | |
| | 22 | environmental impact of the Diablo Range, and it | |
| | 23 | omits the study of Altamont Pass, a serious flaw. | |
| | 24 | High-speed rail should be built in | |
| | 25 | California only where its environmental impacts | |

| | 1 | don't outweigh its environmental benefits. | |
|----------|----|---|------------|
| | 2 | The two routes through Henry Coe State | PH-SJ034-1 |
| | 3 | Park are clearly forbidden by the California | cont |
| | 4 | Wilderness Act. Therefore, these routes should | |
| | 5 | be withdrawn immediately. Given that CEQA, the | |
| | 6 | California Environmental Quality Act, requires | |
| | 7 | that all feasible alternatives should be stated, | |
| 1 | 8 | I call you to revise and to recirculate the draft | |
| | 9 | EIR to include the Altamont Pass route. Thank | |
| | 10 | you very much. | |
| | 11 | MR. PETRILLO: Thank you. Georgia Stigall | |
| | 12 | followed by Garry Stoddard. | |
| PH-SJ035 | 13 | GEORGIA STIGALL: Thank you for the | |
| | 14 | opportunity. My name is Georgia Stigall. I'm | PH-SJ035-1 |
| | 15 | the president and representing the Santa Clara | |
| | 16 | Valley Chapter of the California Native Plant | |
| | 17 | Society. We are a state-wide site based on | |
| | 18 | conservation and organization. We concern | |
| | 19 | ourselves with conservation of native plants and | |
| | 20 | their habitat. | |
| | 21 | I would like to say first, we do support | |
| | 22 | sound environmental policy, science-based | |
| | 23 | environmental policy. So to the extent there are | |
| | 24 | any options that were not included, we think that | |
| | 25 | should be reconsidered as part of CEQA. | |

PH-SJ035-1 cont

| 1 | The California Native Plant Society has |
|------|---|
| 2 | literally decades of on-the-ground field |
| 3 | experience in the Hamilton/Diablo Range. And |
| 4 | because of that, we have amateur and professional |
| 5 | scientists who do field work and plant surveys |
| 6 | and so forth. |
| 7 | And for those who may not know, I would |
| 8 | like to mention when we talk about the study of |
| 9 | plants, we don't talk about individual units. |
| 10 | But we talk about plants as part of a bioregional |
| 11 | and part of an ecosystem. |
| 12 | So we are intimately familiar with the |
| · 13 | habitat values of, not only Henry Coe, but all |
| 14 | the entire bioregional, including San Antonio |
| 15 | Valley, Isabelle Valley, and Pacheco Pass, the |
| 16 | entire region. |
| 17 | And several people have mentioned |
| 18 | endangered species. There are in fact legally |
| 19 | listed species. But I would like to say that in |
| 20 | addition to that and I know a lot of people |
| 21 | share that view the simple fact there's intact |
| 22 | viable habitat and I won't use the word |
| 23 | "pristine" because it's not really a scientific |
| 24 | term but there are intact viable habitats. |
| 25 | And that entity alone in California throughout |

North America is, in fact, very endangered. And 1 2 we're very fortunate to have that in our region. 3 We want to preserve that. I heard a lot folks mention of economic 5 considerations. I certainly understand that. I 6 suggest in addition to the economic value in our 7 urban and southern urban regions, there's a reason that people come from all over the world 8 9 to visit and spend money in the Bay Area. I could personally think -- just sitting in my 10 11 seat, I thought of over two dozen people that 12 have come from the East Coast and other countries 13 to visit the Hamilton/Diablo Range along with the 14 Santa Cruz Mountains and the entire area. So 15 when we talk about economics, let's include these 16 areas and how they contribute to that. 17 So I would like to be sure I clarify the 18 California Native Plant Society adamantly opposes 19 any further disruption of these regions. We 20 don't consider them viable or practical choices 21 for a transportation corridor. And that if you 22 do accept this region, we'll end up with nothing 23 but what will be for awhile a pretty view; all 24 the other values will be gone. Eventually, the 25 pretty view will be gone, because the air

PH-SJ035-1

BELL & MYERS, CSR, INC.

| 1 | pollution and the attendant fire suppression, |
|----|---|
| 2 | which somebody touched on, will result in a vast |
| 3 | plant community of dead plants. And then we'll |
| 4 | have all kinds of problems that I don't have time |
| 5 | to articulate right now. But I hope you'll |
| 6 | consider them. Thank you for your time. |
| 7 | MR. PETRILLO: One question. You said air |
| 8 | pollution contributed to high-speed rail? |
| 9 | GEORGIA STIGALL: What I'm talking about |
| 10 | is the general thank you for asking for |
| 11 | clarification the general air pollution in the |
| 12 | Bay Area certainly contributes to the fauna |
| 13 | mortality. |
| 14 | And a gentleman spoke to the issue that |
| 15 | in state wilderness, we generally, not always but |
| 16 | generally, let fires burn. Without fire we will |
| 17 | have a fuel built up that will result in many |
| 18 | problems including removing the aesthetic appeal |
| 19 | of the region. |
| 20 | Does that make sense? |
| 21 | MR. PETRILLO: Thank you very much. |
| 22 | GEORGIA STIGALL: And we will submit |
| 23 | comments in writing. Thank you. |
| 24 | MR. DIRIDON: As Garry is coming forward, |
| 25 | earlier today we heard testimony that showed our |

PH-SJ035-1

| 1 | airlines contribute more than any other single |
|----|---|
| 2 | transportation device to the air pollution and |
| 3 | precursor to global warming. And high-speed rail |
| 4 | is a replacement of some of the airlines. I |
| 5 | can't understand why there would be a concern for |
| 6 | high-speed rail contributing to air pollution. |
| 7 | GEORGIA STIGALL: That isn't what I said. |
| 8 | Am I allowed to clarify? |
| 9 | MR. DIRIDON: It would reduce air |
| 10 | pollution. |
| 11 | GEORGIA STIGALL: That isn't what I said. |
| 12 | I don't think it's fair to wait until I have left |
| 13 | the mike. |
| 14 | MR. DIRIDON: I didn't mean to be rude to |
| 15 | you, but I think it's a misunderstanding. |
| 16 | GEORGIA STIGALL: I didn't contribute air |
| 17 | pollution to the high-speed rail. I'm |
| 18 | attributing it to the car pollution. And I |
| 19 | personally don't think we'll have a reduction in |
| 20 | car pollution. And I will be happy to discussion |
| 21 | that at a another time. |
| 22 | MR. DIRIDON: I've driven an electric car |
| 23 | since '96. |
| 24 | GEORGIA STIGALL: Other people have been |
| 25 | waiting for their turn. |

| PH-SJ036 | 1 | MR. PETRILLO: Garry Stoddard followed by | |
|----------|----|--|------------|
| | 2 | Rex Lindsay. | |
| | 3 | GARRY STODDARD: Thank you for allowing me | PH-SJ036-1 |
| | 4 | to speak today. Someone mentioned earlier, and I | |
| | 5 | believe it was you, mentioned Highway 130. I | |
| | 6 | live on Highway 130, and it is such an important | |
| | 7 | roadway that they have a stop sign on the west | |
| | 8 | end so you can drive to the golf course without | |
| | 9 | having to stop. It's not exactly a thoroughfare | |
| | 10 | through those hills. | |
| | 11 | You know I've been coming down here for | |
| | 12 | 25 or 30 years for all these meetings for | |
| | 13 | something that I agreed or disagreed. I'm | |
| | 14 | attempting to find something I agree with. I | |
| | 15 | have compromised to give up something to get | |
| | 16 | nothing. So I don't compromise any more. I'm | |
| | 17 | against everything. | |
| | 18 | I have given up zoning sites. I've given | |
| | 19 | up I have more restrictions that I used to | |
| | 20 | have. I have less fire protection, less police | |
| | 21 | protection, and I live an hour and a half from | |
| | 22 | that highway. So it takes me almost as long to | |
| | 23 | drive here as it will take on your high-speed | |
| | 24 | train from Los Angeles to San Jose. | · |
| | 25 | If I was going to use that high-speed | |

PH-SJ036-1

| 1 | train for something, I would use it for |
|-----|---|
| 2 | population redistribution. I would run it to |
| 3 | Nevada and let the people get off on the other |
| 4 | side of the state line. And if we ran enough of |
| 5 . | them over there, we wouldn't need any more |
| 6 | highways or trains. There wouldn't be anybody |
| 7 | left here. And the people that were left here |
| 8 | could get around without a problem. |
| 9 | It bothers me the county has bothered to |
| 10 | restrict what I can do for parcel sites, what I |
| 11 | can to with my property. And we agreed a long, |
| 12 | long time ago on a county general plan not to usé |
| 13 | parcel splits, not to develop, not to do anything |
| 14 | in that country. And I think that I don't |
| 15 | think there's been enough lot splits in 25 years |
| 16 | to add up to what we could to in one year. And |
| 17 | we've attempted to leave it the way it is, and |
| 18 | now we want to put a train through it. And we |
| 19 | want to put a highway up in Del Puerto Canyon. |
| 20 | So I decided that all the years I've come |
| 21 | down here and haven't won a battle yet, I'm going |
| 22 | to support all of these. Because anything that |
| 23 | I've supported in all the years I've been coming |
| 24 | here has never passed. Thank you very much. |
| 25 | MR. DIRIDON: I've been hearing from |

BELL & MYERS, CSR, INC.

| | 1 | Garry and it's always worth a chuckle about | |
|----------|----|--|------------|
| | 2 | 25 years of my life, almost 30 years of my life, | |
| | 3 | he and the next rascal that's coming forward and | |
| | 4 | spice up our meetings continuously with quick | |
| | 5 | wisdom; and it's nice to hear from you. | |
| | 6 | MR. PETRILLO: Okay. Rex Lindsay followed | |
| | 7 | by Cribar Zachary. | |
| PH-SJ037 | 8 | REX LINDSAY: I have fought with Rod for, | |
| | 9. | gosh, 20 years I guess. Now I end up on the | |
| | 10 | Board of Directors with him, and I have to be | PH-SJ037-1 |
| | 11 | nice to him. | |
| | 12 | I represent the Mount Hamilton Range | |
| | 13 | Improvement Association officially. However, my | |
| | 14 | two compatriots have stolen all my thunder. But | |
| | 15 | let me tell you a little bit about the Range. | |
| | 16 | Highway 130, you asked about, it's about | |
| | 17 | 20 miles long. But if it were a snake and you | |
| | 18 | grab a hold of its tail, it would probably | |
| | 19 | stretch for 40 miles. | |
| | 20 | Garry has got to break a few speed limits | |
| | 21 | to make it in an hour and a half to San Jose. It | |
| | 22 | takes me an hour and fifteen minutes, and I'm a | |
| | 23 | half hour closer than he is. | |
| | 24 | We represent about 200,000 acres, almost | |
| | 25 | a quarter of the country. Having there are | |
| | 23 | a quarter or the country. Having there are | |

| | 1 | Garry and it's always worth a chuckle about | |
|----------|----|--|------------|
| | 2 | 25 years of my life, almost 30 years of my life, | |
| | 3 | he and the next rascal that's coming forward and | |
| | 4 | spice up our meetings continuously with quick | |
| | 5 | wisdom; and it's nice to hear from you. | |
| | 6 | MR. PETRILLO: Okay. Rex Lindsay followed | |
| | 7 | by Cribar Zachary. | |
| PH-SJ037 | 8 | REX LINDSAY: I have fought with Rod for, | |
| | 9. | gosh, 20 years I guess. Now I end up on the | |
| | 10 | Board of Directors with him, and I have to be | PH-SJ037-1 |
| | 11 | nice to him. | |
| | 12 | I represent the Mount Hamilton Range | |
| | 13 | Improvement Association officially. However, my | |
| | 14 | two compatriots have stolen all my thunder. But | |
| | 15 | let me tell you a little bit about the Range. | |
| | 16 | Highway 130, you asked about, it's about | |
| | 17 | 20 miles long. But if it were a snake and you | |
| | 18 | grab a hold of its tail, it would probably | |
| | 19 | stretch for 40 miles. | |
| | 20 | Garry has got to break a few speed limits | |
| | 21 | to make it in an hour and a half to San Jose. It | |
| | 22 | takes me an hour and fifteen minutes, and I'm a | |
| | 23 | half hour closer than he is. | |
| | 24 | We represent about 200,000 acres, almost | |
| | | | |

a quarter of the country. Having -- there are

1 four members in this audience. We have the 2 highest percentage in any organization at present 3 at this meeting, because there's only about a 120 of us. 5 There's been very few changes since the 6 1900s. To put numbers to Garry's comments, we 7 were allowed during Rod Diridon's time in 8 meetings with the environmental community and 9 within our community, we decided we could create 10 no more than 25 parcels in any one year. We have 11 created 28 parcels in last 24 years. There's not 12 much changing in our area. The idea of a train 13 going through there, I shudder. 14 I was going to talk about fires, and 15 Charles Luckhardt did it for me. But how about 16 the terrorist activity? What a wonderful place 17 that would be for them to decide to do something, 18 because there's thousands and thousands of acres 19 with no people. 20 Someone here walked the route through Coe 21 Park. I guarantee you, no one has walked the 22 route that you showed through the northern part 23 of the Diablo Range through the San Antoine 24 Valley and through the Isabelle Valley. 25 First place, you probably would trespass

PH-SJ037-1 cont

| | 1 | on so many lands that somebody would catch you | |
|----------|----|---|-----------|
| | 2 | before you got through. And you would be | |
| | 3 | probably spent two to four days. And if you are | PH-SJ037- |
| | 4 | going to do it, I recommend a guide. | cont |
| | 5 | I'm in favor of the Pacheco Pass route | |
| | 6 | from what I have heard. I'm very much opposed to | |
| | 7 | going through the Diablo Range. | |
| 1 | 8 | Just the idea of trying to do the | |
| | 9 | construction, there are no filling stations. The | |
| | 10 | closest grocery store is a an hour and a half | |
| | 11 | away. There's no place for anyone to stay. | |
| | 12 | There's one route that goes through the area and $^{\circ}$ | |
| | 13 | the range extends 10 and 15 miles on either side | |
| | 14 | of that road where there are no roads. | |
| | 15 | So I would ask you to not consider the | |
| | 16 | northern routes through the Diablo Range. And I | |
| | 17 | appreciate your time, and I will add Garry and | |
| | 18 | Chuck stole all my jokes. | |
| | 19 | MR. PETRILLO: Thank you. Cribar Zachary | |
| | 20 | followed by Richard McDonald. | |
| PH-SJ038 | 21 | ZACHARY CRIBAR: Zachary Cribar, that is. | |
| | 22 | Good afternoon to the members and good afternoon | PH-SJ038- |
| | 23 | to the ladies and gentlemen behind me just the | |
| | 24 | same. | |
| | 25 | My name is Zachary Cribar, and I am a 17 | |

| 1 | year old public transportation advocate. I would | |
|----|---|------------|
| 2 | like to take this time to restate to the | |
| 3 | Authority and public, as I stated at the San | PH-SJ038-1 |
| 4 | Francisco public hearing on the date of Thursday | |
| 5 | April 15, 2004, for starters with simplicity I | |
| 6 | would like to offer to the Authority to use my | |
| 7 | comments and any comments from any other public | |
| 8 | presentation speakers to help you work with the | |
| 9 | federal agency in advocating for accident | |
| 10 | prevention over that of accident survival. | |
| 11 | Number 2, I would like to highly | |
| 12 | encourage the Authority to plan for the future. ' | |
| 13 | Plan for an overcrowded system, for a system that | |
| 14 | will be unable to comfortably fit the number of | |
| 15 | riders predicted. We do not want to see this | |
| 16 | system to become a victim of its own success as | |
| 17 | the system of Salt Lake City, Utah has become. | |
| 18 | Number 3, why not use more alternatives? | |
| 19 | You can have various lines. Have a line from the | |
| 20 | Los Angeles and San Diego areas to the Bay Area | |
| 21 | via Altamont Pass, and at the same time have a | PH-SJ038-2 |
| 22 | loop service from Sacramento to Los Banos to San | |
| 23 | Jose to San Francisco and back up the I-80 | |
| 24 | corridor to Sacramento. | |
| 25 | Number 4, I would like you to investigate | PH-SJ038-3 |

this equation being: Convenience, plus, time, 1 2 plus, cost, plus, reliability. You must meet to this equation if you wish to divert riders to 3 your system. I will, as I did in San Francisco, use San Francisco Muni as an example of this. 7 Utilizing Muni is much more convenient than 8 utilizing my car. In my car I would have to walk 9 a thousand miles to get to my final destination. 10 Muni will drop me off to my final precisely. 11 Time: It's much slower driving through 12 San Francisco than taking Muni. Muni also costs 13 less. Muni also is much more cost efficient, and 14 it's reliable enough. I can depend on a service on the bus -- excuse me -- coming every six 15 16 minutes. 17 Number 5, partnership with your other 18 transit agencies to meet to this equation. These 19 transit agencies which your rail service will be 20 servicing. If I cannot have adequate service in 21 those areas, then I will not be able to get to my 22 final destination in a way that I would 23 appreciate. 24 And last by not least, if you need more 25 money and more time to create a much more viable

PH-SJ038-3 cont

BELL & MYERS, CSR, INC.

| | 1 | and efficient service, then we will obviously | |
|----------|----|---|--------------------|
| | 2 | need to further investigate and wait. | |
| | 3 | And I would like to close by saying in | PH-SJ038-3 cont |
| | 4 | Martin Luther King's words, "I have a dream." | |
| | 5 | However, my dream is that this system will not | |
| | 6 | only be a California system, but futuristically | |
| | 7 | an American system. Thank you and God bless for | |
| , | 8 | this time. | |
| | 9 | MR. PETRILLO: Thank you. Richard | |
| | 10 | McDonald followed by Margaret Okuzumi. | |
| PH-SJ039 | 11 | RICHARD McDONALD: Ladies and gentlemen, | |
| | 12 | good afternoon. My name is Richard McDonald. My- | PH-SJ039-1 |
| | 13 | family is one of three families that own the | |
| | 14 | Isabel Valley Ranch located in the Diablo Range | |
| | 15 | southeast of San Jose. The other owners are the | |
| | 16 | O'Neals and Swenson families. | |
| | 17 | I'm here today to speak in opposition to | |
| | 18 | the Diablo Range direct alternative route. And | |
| | 19 | specifically to propose a northern tunnel | |
| | 20 | alignment to the San Jose segment of the proposed | |
| | 21 | high-speed train project. | |
| | 22 | The other property owners have also made | |
| | 23 | the Board aware of our opposition to this | |
| | 24 | proposal and will or have further addressed their | |
| | 25 | concerns to the Board. | |

| _ | |
|----|--|
| 1 | The Diablo Range direct northern tunnel |
| 2 | alignment would result in extreme environmental |
| 3 | damage to the Isabel Valley and the entire Diablo |
| 4 | Range. It will cause severe habitat destruction, |
| 5 | major fragmentation, and significant disruption |
| 6 | for a number of species, included protected |
| 7 | species, such as, tuly elk, four-horned antelope, |
| 8 | mountain lions, eagles, and virtually any other |
| 9 | species of animal or bird that inhabits the area. |
| 10 | There will be significant adverse impacts |
| 11 | to the area, such as, the water shed, the |
| 12 | underground aquifer, the geology, the archeology, |
| 13 | and current cultural values of the community that |
| 14 | live in those hills. |
| 15 | In short the bullet train would be an |
| 16 | environment disaster to the entire $\underset{i}{\text{Diablo}}$ Range |
| 17 | and especially to the Isabel Valley. The Isabel |
| 18 | Valley Ranch itself consists of approximately |
| 19 | 12,000 acres. The same families have owned and |
| 20 | operated and maintained this property in their |
| 21 | virtually natural state for over 50 years. Many |
| 22 | other family-owned ranches in those hills go back |
| 23 | much further than that. |
| 24 | Our ranch and as well as those of our |
| 25 | neighbors will literally be bisected by the |

PH-SJ039-1 cont

BELL & MYERS, CSR, INC.

proposed train cutting the property in half. And 1 2 with it the habitat and migrational corridors for 3 hundreds if not thousands of protected species, including elk, antelope, eagles, and thousands of 5 others. The environmental impacts would destroy 6 forever the natural state of this valley, which 7 is today much as it was a hundred years ago or 8 200 ago or 500 years ago. Save except for a few 9 spot ponds and primitive lakes, some pasture and fire trails, the Isabelle Valley today is truly a 10 11 wilderness area even though it's only 25 miles 12 from San Jose. 13 The three families that own Isabel Valley Ranch share a great strong commitment to keeping 14 15 this land in its natural state. The property of 16 the Wilderness Act, it is not for sale; it is not 17 held for development. 18 The ranch has passed through three 19 generations of owners in its same condition, and 20 it's our commitment to pass it on as we took it 21 on. A high-speed bullet train makes many 22 trips through the valley, much of which is shown 23 at a great elevation, would be an environmental 24 25 abomination.

PH-SJ039-1 cont

| 1 | For your reference I have taken a few | 1 |
|----|---|--------------------|
| 2 | snap shots in the vicinity of the proposed | |
| 3 | alignment, and I based that vicinity on Sheet 2 | PH-SJ039-1 cont |
| 4 | of 5 from one of the maps I obtained at the HRA | |
| 5 | offices and I appreciate the staff for opening | |
| 6 | the doors and allowing me to look at those | |
| 7 | documents. The photographs are attached to the | |
| 8 | written version circulated to each Board member. | |
| 9 | And, although, these photos were from a | |
| 10 | disposable camera, they show photos of elk and a | |
| 11 | coyote posed for a snapshot along the road. They | |
| 12 | convey a sense of the natural beauty of the area. | |
| 13 | MR. PETRILLO: You're going over the three | |
| 14 | minutes, so if you can submit it in writing and | |
| 15 | RICHARD McDONALD: I will close. I have | 1 |
| 16 | some other points I would like to make for the | |
| 17 | record. As owners of the property, we were | |
| 18 | struck by the lack of notice of communication | PH-SJ039-2 |
| 19 | from HRA and its staff and consultants. It's | |
| 20 | only in the last 60 days we've been made aware of | |
| 21 | this project. No one has contacted the owners | |
| 22 | for access or information and it is impossible to | |
| 23 | conduct a thorough environmental review of this | |
| 24 | project by drawing lines on high altitude maps. | |
| 25 | Site field operations would be critical mandatory | PH-SJ039-3 |
| | | i |

| | 1 | for the review of the project. The Board is | PH-SJ039-3 |
|----------|----|---|------------|
| | 2 | urged to reject the Diablo Range alternative. | cont |
| | 3 | Thank you. | |
| | 4 | MR. PETRILLO: I'm curious. Are these | |
| | 5 | working ranches or | |
| | 6 | MR. McDONALD: Well, many of them are | |
| | 7 | working ranches, working cattle ranches, a | |
| | 8 | variety of agricultural purposes. Much of the | |
| | 9 | country is wide open, and many family-owned | |
| | 10 | ranches are back there, many of which have been | |
| | 11 | there for many years. | |
| | 12 | MR. PETRILLO: Thank you. Margaret | |
| | 13 | Okuzumi. | |
| PH-SJ040 | 14 | MARGARET OKUZUMI: Good afternoon. I'm | |
| | 15 | Margaret Okuzumi. I'm the executive director of | |
| | 16 | BayRail Alliance, a grass-roots railriders' group | PH-SJ040-1 |
| | 17 | in the Bay Area. We strongly support high-speed | |
| | 18 | rail. | |
| | 19 | Two and a half years ago with help of | |
| | 20 | Roger and I and the some other folks in this | |
| | 21 | room, we held a public forum to help in an | |
| | 22 | event that helped the public understand and to | |
| | 23 | learn more about the high-speed rail project. | |
| | 24 | About that same time we okay we strongly | |
| | 25 | support high-speed rail coming to the the plan | |
| | | | |

CALIFORNIA HIGH SPEED RAIL AUTHORITY

| 1 | to use the Transbay Terminal in San Francisco, |
|----|---|
| 2 | and we certainly hope that the rail extension to |
| 3 | that terminal will not be compromised in any way. |
| 4 | About the time we were holding the forum, |
| 5 | we became aware of the controversy over the |
| 6 | alignments. It was about two and a half years |
| 7 | ago. And after examining the issues, we've |
| 8 | decided to support the many groups that are |
| 9 | asking for a more detailed analysis of the |
| 10 | Altamont alternative to be included in the EIR. |
| 11 | This is a huge investment for the State |
| 12 | of California, and there is just no |
| 13 | short-circuiting the process. If you want |
| 14 | high-speed rail to be successful at the ballot |
| 15 | box, it needs to be studied. Extensive tunneling |
| 16 | is expensive and risky. Building roads in rural |
| 17 | areas is problematic. Some of the arguments we |
| 18 | have heard about the three-way split being |
| 19 | problematic. |
| 20 | First of all, it's not a three-way split |
| 21 | that proponents of the Altamont route have been |
| 22 | asking to be studied. It's a two-way split. In |
| 23 | any case, the BART system regularly splits |
| 24 | trains. And in the case of BART and perhaps in |
| 25 | the case of high-speed rail, there are good |

PH-SJ040-1 cont

BELL & MYERS, CSR, INC.

PH-SJ040-1 cont

| 1 | operational reasons for doing so. Airlines fly |
|----|---|
| 2 | to both San Jose and to San Francisco, and that's |
| 3 | not considered a problem. |
| 4 | Now, I understand also from talking to |
| 5 | various folks in the environmental community, |
| 6 | including Audubon, that crossing the bay or a new |
| 7 | Dumbarton rail bridge may be considered less |
| 8 | problematic than the southern alignments. A new |
| 9 | Dumbarton rail bridge could be designed to help |
| 10 | restore water flows to the bay and other |
| 11 | mitigation measures could be put in place. |
| 12 | Furthermore, I understand that the ship |
| 13 | traffic in that area is very little. It's known |
| 14 | well ahead of time, and it's only about three |
| 15 | ships a year that pass through there. And so |
| 16 | that it might be possible to build a much less |
| 17 | expensive bridge than the one billion dollar |
| 18 | figure I've heard quoted. |
| 19 | And the only way to basically settle |
| 20 | these problems and address these issues is to |
| 21 | study the Altamont alternative and have that |
| 22 | considered in the EIR. And we ask you to do so. |
| 23 | Thank you. |
| 24 | MR. PETRILLO: Thank you. Alan Miller |
| 25 | followed by Barry Swenson. |

BELL & MYERS, CSR, INC.

| PH-SJ041 | 1 | ALAN MILLER: Good afternoon. After I | |
|----------|----|---|------------|
| | 2 | spoke at the last meeting in Modesto, | |
| | 3 | Mr. Diridon, after I sat down, asked people to | |
| | 4 | look at who is backing what he called "alternate | |
| | 5 | plans or boondocks." He said you should ask | PH-SJ041-1 |
| | 6 | yourself, Who are the experts on these people's | |
| | 7 | sides and then look at our experts. | |
| 1 | 8 | Well, actually we asked to look at your | |
| | 9 | experts, the German, French, and the Japanese as | |
| | 10 | mentioned repeatedly by Mr. Diridon and | |
| | 11 | Mr. Morshed. We did a public records request and | |
| | 12 | Senator Murray asked them to produce it. We saw | |
| | 13 | the peer reviews mentioned, and there are no | |
| | 14 | comments regarding route selection. | |
| | 15 | Many said in a recent AP article, the | |
| • | 16 | TRAC opposes rail projects often. This is true. | |
| | 17 | We oppose bad rail projects. | |
| | 18 | Mr. Diridon here is often called the | |
| | 19 | father of light rail. But I wonder is someone | |
| | 20 | proud to be the father of a child that gets Ds | |
| | 21 | and Fs. We opposed the Highway 85 route, and now | |
| | 22 | San Jose has the most expensive slowest and worst | |
| | 23 | riderships of any light rail in the country. | |
| | 24 | We also opposed BART to the airport, and | |
| | 25 | the ridership there is abysmal. We supported a | |

| 1 | plan that cost billions less. We oppose bad rail |
|----|---|
| 2 | projects, because they make rail look bad. |
| 3 | Ironically, they made it look so bad the name San |
| 4 | Jose and BART are associated with these projects |
| 5 | that we oppose and now they've been put together |
| 6 | so the feds are not supporting BART to San Jose. |
| 7 | We came here two years ago and you said |
| 8 | to me, Mr. Diridon, because we were against your |
| 9 | project, we were against high-speed rail. We |
| 10 | came almost alone then, but now it's not just |
| 11 | TRAC. It's the Sierra Club, the Planning and |
| 12 | Conservation League, Nature Conservancy, |
| 13 | Defenders Of Wildlife, CalFlora, State Parks |
| 14 | Foundation, Green Belt Alliance, American Farm |
| 15 | Land & Trust, Surface Transportation Policy |
| 16 | Project. |
| 17 | These people consider themselves |
| 18 | physically concerned environmentalists and in |
| 19 | your current Mercury article, you invite anyone |
| 20 | who doesn't agree with your viewpoint, "You are |
| 21 | not." |
| 22 | What is irresponsible is failure to |
| 23 | recognize mitigation costs needed for one |
| 24 | alternative of your Oakland branch passed through |
| 25 | five miles of wetlands under restoration. A |

PH-SJ041-1

PH-SJ041-1

| | . , . |
|----|---|
| 1 | billion pass through salt evaporators. Yet |
| 2 | nothing pass through the wetlands. |
| 3 | What is irresponsible is moving a bridge |
| 4 | crossing and the cost of the bridge is going to |
| 5 | be billions. What is irresponsible is planning. |
| 6 | In your editorial there will be an environmental |
| 7 | fire storm over at Dumbarton crossing. In |
| 8 | February at the same type of meeting in San Jose |
| 9 | a woman got up from the Sierra Club and said, "We |
| 10 | are the environmentalists? This is a |
| 11 | transportation corridor. We're in favor of it. |
| 12 | Where is the opposition?" |
| 13 | They were literally laughing at his |
| 14 | assertion from the need for massive bay fill in |
| 15 | the scales of San Francisco Airport. The only |
| 16 | environmental fire storm associated with |
| 17 | Dumbarton is in your dreams. |
| 18 | But an environmental fire storm has |
| 19 | already started and is burning in the Diablo |
| 20 | Range from Highway 152 to Mount Hamilton. The |
| 21 | earlier mentioned environmental groups are |
| 22 | saying, Study Altamont. |
| 23 | What is irresponsible is planning the |
| 24 | extra 14 miles to go to San Jose via Altamont |
| 25 | which will take an extra 26 minutes rather than |

BELL & MYERS, CSR, INC.

| 1 | the 10 minutes claimed by everyone for the last | |
|----|---|------------|
| 2 | decade. | |
| 3 | What is irresponsible is failing to | PH-SJ041-1 |
| 4 | mention that Altamont is 8 miles shorter from San | |
| 5 | Francisco to the peninsula and that your own | |
| 6 | ridership study shows double the ridership on the | |
| 7 | San Francisco/ Peninsula leg than the San Jose | |
| 8 | leg. | 1 |
| 9 | MR. PETRILLO: Excuse me. You have gone | |
| 10 | over the three minute time. | |
| 11 | ALAN MILLER: I will wrap it up. Your | PH-SJ041-1 |
| 12 | editorial says that Altamont is infeasible, but | cont |
| 13 | now we have the army core of engineers and the | |
| 14 | National Environmental Protection Agency also | |
| 15 | saying the EIR is incomplete. Study Altamont. | |
| 16 | It isn't just TRAC anymore. We didn't go away, | |
| 17 | and now we're here with an army. The army is | |
| 18 | here outside the castle. And we're refusing to | |
| 19 | surrender. Study Altamont. | |
| 20 | Where is the testimony of French, German, | |
| 21 | and Japanese experts? I am here to say the | |
| 22 | emeritus has no close. | · |
| 23 | MR. PETRILLO: Thank you very much. I do | |
| 24 | want to point out there are eight other members | |
| 25 | of the Board other than Rod Diridon. Barry | • |

PH-SJ042-1

| | 1 | Swenson followed by he's not here. David | |
|----------|----|--|---|
| | 2 | Schonbrunn followed by Yolanda Reynolds. | |
| PH-SJ042 | 3 | DAVID SCHONBRUNN: I'm David Schonbrunn, | F |
| | 4 | president of TRANSDEF. We have been active for | • |
| | 5 | the past ten years in reforming Metropolitan | |
| | 6 | Transportation Commission. Partly as a result of | |
| | 7 | our ongoing legal challenges, MTC is now a | |
| 1 | 8 | changed agency much more responsive to concerns | |
| | 9 | raised by public. | |
| | 10 | Your agency in contrast has not learned | |
| | 11 | this important lesson yet. There has been a | |
| | 12 | fundamental miscalculation leading to the stance * | |
| | 13 | that somehow your Authority can strong-arm | |
| | 14 | whatever plan it wants into approval. On the | |
| | 15 | contrary, you're going to have to convince the | |
| | 16 | public. And the public is not going to go for a | |
| | 17 | plan that knowledgeable environmentalists and | |
| | 18 | rail activists think is a terrible plan. Your | |
| | 19 | current plan is DOA. | |
| | 20 | Your selection of alternatives illegally | |
| | 21 | excluded the previous high-speed rail | |
| | 22 | commission's preferred alternative. That just | |
| | 23 | stinks of a back room deal. There's no way their | |
| | 24 | project is going forward without an honest study | |
| | 25 | of the Altamont alignment in the bright light of | |

BELL & MYERS, CSR, INC.

PH-SJ042-1 cont

| 1 | day. |
|----|---|
| 2 | By the end of today, you will have heard |
| 3 | a large number of Silicon Valley residents parrot |
| 4 | a script containing a list of falsehoods. That |
| 5 | list shares a lot in common with a outbid written |
| 6 | by High-speed Rail Authority Chair Rod Diridon |
| 7 | Senior. We all know Rod, the manufacturers, and |
| 8 | the Mayor think that San Jose is the center of |
| 9 | the universe. This does not entitle them to come |
| 10 | up with cock-and-bull stories to support their |
| 11 | desire to steer billions of dollars into a set |
| 12 | sinkhole that is second to BART to San Jose. |
| 13 | We see a much better plan for Silicon |
| 14 | Valley where the Altamont alignment also provides |
| 15 | a BART-level of service to San Jose from Fremont. |
| 16 | VTA could then spend 2 billion on transit for |
| 17 | Santa Clara County much to its advantage. |
| 18 | The advocacy you've heard for a southern |
| 19 | route is irrelevant to the EIR advocacy issue |
| 20 | before you now. This isn't the time for merits |
| 21 | comments even if they were informed comments. |
| 22 | Instead this is the time to tell you what you |
| 23 | need to do to have an adequate EIR. |
| 24 | The failure to study the Altamont |
| 25 | alignment is a glaring matter of inadequacy that |

BELL & MYERS, CSR, INC.

| 1 | no amount of advocacy by Mr. Diridon can | |
|----|---|------------|
| 2 | overcome. The conclusions he reached in his | |
| 3 | albeit were based not on environmental review, | PH-SJ042-1 |
| 4 | because there was none, but on his San | cont |
| 5 | Jose-centered world view. We will prove as time | |
| 6 | goes on that his points were consistently wrong. | |
| 7 | I would think that Mr. Diridon's being | |
| 8 | known as the father of the light rail system that | |
| 9 | has some of the worst operating ratios in the | |
| 10 | nation would be enough recognition for a | |
| 11 | lifetime. But, no, he obviously wants to repeat | |
| 12 | that miserable distinction, blowing a lot more $^{\circ}$ | |
| 13 | money in the process. | |
| 14 | I'm wearing my high-speed rail volunteer | |
| 15 | badge. I'm ready to assist in campaigning for | |
| 16 | high-speed rail, but it will require a change in | |
| 17 | behavior. | |
| 18 | MR. PETRILLO: You are extending over | |
| 19 | three minutes. | |
| 20 | DAVID SCHONBRUNN: What we want is the | 1 |
| 21 | following: Stop the lying. Start telling the | PH-SJ042-1 |
| 22 | truth. And study a reasonable range of | |
| 23 | alternatives including Altamont. Then we will be | |
| 24 | happy to work with you. Thank you. | |
| 25 | MR. PETRILLO: Thank you very much. | |

IIS Depart

BELL & MYERS, CSR, INC.

| 1 | Again, I want to point out again, that Mr. Diridon |
|----|--|
| 2 | is only one of the members of the Authority. |
| 3 | DAVID SCHONBRUNN: He's the one in |
| 4 | the in the paper. |
| 5 | MR. PETRILLO: He can and any individual |
| 6 | members of the Authority can to whatever they |
| 7 | want, and it's their right. We have eight others |
| 8 | who are listening to this. |
| 9. | I also want to point out that I have |
| 10 | heard comments from all sorts of different |
| 11 | organizations today. Some indicated their |
| 12 | support for Altamont; some indicating their |
| 13 | support for the Diablo; and some indicating their |
| 14 | support for Pacheco. The ones indicating their |
| 15 | support for Pacheco happen to be environmental |
| 16 | groups also. |
| 17 | We have to make a decision at some |
| 18 | particular point among the different comments, |
| 19 | and that's what these hearings are about. So we |
| 20 | can hear this; look at all the stuff that you |
| 21 | have said; and respond in the Environmental |
| 22 | Impact Report. |
| 23 | DAVID SCHONBRUNN: Mr. Chairman, if I may, |
| 24 | there was an additional category you failed to |
| 25 | mention and that is there is a lot of us who |

| 1 | are here not for one of the alignments but for an |
|----|---|
| 2 | adequate study of alternatives. That's a very |
| 3 | different issue than the merits questions you |
| 4 | just raised. |
| 5 | MR. PETRILLO: Thank you. |
| 6 | MR. DIRIDON: And may I make the comment, |
| 7 | Mr. Chair, the article in the paper was reviewed |
| 8 | by the technical experts that associated |
| 9 | themselves with our program before it was |
| 10 | submitted to the newspaper. And the information |
| 11 | that's been offered now by several people at the |
| 12 | microphone mischaracterizes the information |
| 13 | included in that document; just as they seem to |
| 14 | mischaracterize quite a bit of other information |
| 15 | that's been offered to the community. And I'm |
| 16 | sad about that. |
| 17 | I think if we can keep away from |
| 18 | personalities, then you begin to attack an |
| 19 | individual instead of ideas. That suggests a |
| 20 | bankruptcy in your ability to focus on the issue. |
| 21 | And the issue here is comment on the |
| 22 | Environmental Impact Report. That's what will |
| 23 | help us to accomplish this objective, please. |
| 24 | MR. PETRILLO: Yolanda Reynolds followed |
| 25 | hu Frank Toggo |

PH-SJ043-1

| PH-SJ043 | 1 | YOLANDA REYNOLDS: Good afternoon. My |
|----------|----|---|
| | 2 | name is Yolanda Reynolds, and I don't know the |
| | 3 | gentleman who spoke before me but I too urge you |
| | 4 | to pay attention to what he said. Maybe you can |
| | 5 | disregard the names mentioned. However, the |
| | 6 | facts that were presented are shared by many in |
| | 7 | the community. So I would urge you to be very |
| 1 | 8 | aware of that because what he has said told |
| | 9 | you, I've heard out in the community. And I do |
| | 10 | get around, as you know, Mr. Diridon. |
| | 11 | One of the things that is not mentioned |
| | 12 | or has not been mentioned this afternoon I think $^{\circ}$ |
| | 13 | is lacking in this particular project in terms of |
| | 14 | analysis is the issue of security. You are |
| | 15 | having hundreds of miles of fixed rail, and there |
| | 16 | is nothing or no one has spoken to what type |
| | 17 | of security we are going to have. |
| | 18 | At the cost of this high-speed rail, we |
| | 19 | would be competing with terrorist the |
| | 20 | possibility of a terrorist attack that would |
| | 21 | compete with the World Trade blow up, and I would |
| | 22 | urge I just don't understand. It's going to |
| | 23 | be fixed rail. Are we going to have one |
| | 24 | man one person overlooking every mile of that |
| | 25 | rail? I would like to know how that's going to |
| | | |

BELL & MYERS, CSR, INC.

| 1 | be handled. | |
|----|---|-------------|
| 2 | Others ahead of me have spoken very well | PH-SJ043-1 |
| 3 | and very eloquently on the environmental impact. | COIR |
| 4 | I won't repeat that, but I do hope you will | |
| 5 | listen to that. I'm not a member of any of these | |
| 6 | other than the Sierra Club, which my husband | |
| 7 | actually belongs to. | |
| 8 | I really object to anything that would go | |
| 9 | through Coe Park. My sons are now grown men, and | - |
| 10 | that is where we took them when they were | PH-SJ043-2 |
| 11 | children to enjoy the wilderness. And that's | 111-330-3-2 |
| 12 | where we felt we could trust them to be there | |
| 13 | alone at night to learn how to camp out. It has | |
| 14 | been a very important part of my family's life | |
| 15 | and as I heard others speak it was as well for | |
| 16 | them. So anything like that if you do go ahead | |
| 17 | on this project. | |
| 18 | The other thing I wanted to mention, | |
| 19 | again, which was spoken to very well by Lowell | |
| 20 | Grattan, and that was that the projected | |
| 21 | ridership. I remember the figures that were | |
| 22 | submitted for the light rail. I'm speaking as a | DU C1042-2 |
| 23 | former transportation commissioner for the County | PH-SJ043-3 |
| 24 | of Santa Clara, and I served for almost nine | |
| 25 | years. It was quite a disappointment to me I | : |
| | | |

| 1 | came onboard very supportive of mass transit. | 1 |
|----|---|------------|
| 2 | And I left the solution. | PH-SJ043-3 |
| 3 | Last night I was downtown on First | Cont |
| 4 | Street. What did I see? The same thing I said | |
| 5 | once before, all I could count was four little | |
| 6 | heads in that train. That is still the | |
| 7 | situation. | |
| 8 | I rather question the numbers that are | |
| 9 | given as for ridership on the train and | |
| 10 | especially if we begin to have more threats, | |
| 11 | terrorist threats. And I certainly concur with | |
| 12 | the folks who are saying, look at Altamont. | |
| 13 | Because one of the real problems that I saw as a | |
| 14 | member of the commission was exactly the way the | |
| 15 | light rail lines were laid out and how it did | . • |
| 16 | not they did not coordinate at all. And in | |
| 17 | fact at one point there was an attempt to get rid | PH-SJ043-4 |
| 18 | of all the buses. So there isn't more ridership, | 111 550 15 |
| 19 | and there's still no ridership. And it has a lot | |
| 20 | to it with where the rail lines were put. Thank | |
| 21 | you for listening to me, and I hope you listen to | : |
| 22 | the people who spoke very well on the | |
| 23 | environmental impact and on those farmers. That | |
| 24 | is so important to all of us. | |
| 25 | MR. PETRILLO: You've gone over. Thank | ł |

| | 1 | you. Frank Jesse followed by Dr. Lee Boese. | |
|----------|----|---|------------|
| PH-SJ044 | 2 | FRANK JESSE: My name the Frank Jesse. | |
| | 3 | I'm vice-president of VEA Systems, a technology | PH-SJ044-1 |
| | 4 | company in the valley. | |
| | 5 | First of all, I want to thank you very | |
| | 6 | much for this hearing and being able to address | |
| | 7 | the Commission and thank you very much. | |
| 1 | 8 | The main point that a couple of major | |
| | 9 | points I want to emphasize: One, being the key | |
| | 10 | importance that Silicon Valley represents to | |
| | 11 | California. I was speaking with some executives | |
| | 12 | in San Francisco with some other companies, and | |
| | 13 | they were emphasizing in the banking community | |
| | 14 | and other economic areas that when all is said | |
| | 15 | and done, Silicon Valley still represents the | |
| | 16 | locomotive if I can use the analogy that | |
| | 17 | really drives an enormous part of California's | |
| | 18 | economy. | |
| | 19 | So creating this rail connection to | |
| | 20 | interconnect the key vital economic parts of | |
| | 21 | California is truly a very critical enterprise. | |
| | 22 | Everything we can do to make that rail connection | |
| | 23 | to be optimized and really work in the frequency | |
| | 24 | and create the usage that will drive those | |
| | 25 | economic benefits will help the state in so many | |

| | 1 | dimensions, including to be able to fund | , |
|----------|------|---|------------|
| | 2 | economic or environmental desires as well. | : - |
| | 3 | So I want to emphasize, not a particular | PH-SJ044-1 |
| | 4 | knowledge about one alignment or the other of the | cont |
| | 5 | southern alignments, but an emphasize of creating | |
| | 6 | the most expedient routing, which would have a | |
| | 7 | southern alignment one way or another, certainly | |
| | 8 | taking into account the various environmental | |
| | 9 | issues. | |
| | . 10 | Again, I want to emphasize a need to not | |
| | 11 | have the rail be divided to a northern alignment | |
| | 12 | that would cause a lack of convenience to the | |
| | 13 | functionality of the rail. Thank you very much. | |
| | 14 | MR. PETRILLO: Thank you. Dr. Lee Boese. | |
| | 15 | And after this, we will take another five-minute | |
| | 16 | break at this time. | |
| PH-SJ045 | 17 | DR. LEE BOESE: Mr. Chairman and members | |
| | 18 | of the Board, as chairman of the Merced County | PH-SJ045-1 |
| | 19 | High-speed Rail Committee, I'm here to advocate | 111 550 15 |
| | 20 | support for the Diablo Range alternative as the | |
| | 21 | preferred route of the two routes currently | |
| | 22 | proposed on the EIR. | |
| | 23 | Our reasons for supporting this are the | |
| | 24 | following: | |
| | 25 | First, one of the stated goals in the EIR | |

| 1 | is for the proposed rail system to move |
|----|---|
| 2 | passengers in the quickest and most efficient |
| 3 | method. If the Diablo alternative is chosen, |
| 4 | that would cut travel time by 24 minutes from San |
| 5 | Francisco to the Los Angeles route. Moreover, it |
| 6 | would cut time from San Jose to Merced by 6 to 8 |
| 7 | minutes. Ridership is maximized by the frequency |
| 8 | and speed of the operation. |
| 9 | The second reason we support Diablo is a |
| 10 | train service would be more frequent and a |
| 11 | greater number of people in the northern part of |
| 12 | the Central Valley would be served. If Pacheco |
| 13 | were chosen, a large portion of citizens would |
| 14 | not be thought of in Chowchilla, Fresno, or Los |
| 15 | Banos. |
| 16 | For many citizens of the valley, Pacheco |
| 17 | would be considered a rural route and ridership |
| 18 | in Northern California would not be served. |
| 19 | The Diablo route would allow people from |
| 20 | Stockton, Tracy, Modesto, and Merced to be able |
| 21 | to take this train, and thus ridership in the |
| 22 | initial phase would be greater. This is also one |
| 23 | of the stated goals in the EIR. |
| 24 | The third reason we support Diablo is |
| 25 | there would be considerably less impact on |

PH-SJ045-1 cont

BELL & MYERS, CSR, INC.

| 1 | agricultural land going through Drablo rather |
|----|---|
| 2 | than Pacheco, which would have the train |
| 3 | traveling through vast areas of prime |
| 4 | agricultural land. |
| 5 | We also think Diablo overall is less |
| 6 | environmentally harmful when compared to Pacheco |
| 7 | in that many of the environmental issues can be |
| 8 | mitigated through tunneling under or going around |
| 9 | Henry Coe Park as the northern alternative route |
| 10 | shows on the EIR. |
| 11 | The fifth reason we support the Diablo |
| 12 | routes, or more specifically the Merced to San |
| 13 | Jose routes, the proposed maintenance and |
| 14 | construction facility would be utilized at Castle |
| 15 | Airport, Aviation & Development Center. The |
| 16 | Pacheco would rule out Castle Air Force Base and |
| 17 | maintenance facility. |
| 18 | Lastly, while we, the Merced County |
| 19 | High-speed Rail Committee, realize no EIR is |
| 20 | perfect and one this size certainly cannot |
| 21 | address all the thoughtful concerns of everyone |
| 22 | here, our committee believes the Authority has |
| 23 | done a tremendous job in terms of resourcing to |
| 24 | put this EIR together. |
| 25 | As a citizen and health care professional |

PH-SJ045-1 cont

| | 1 | living in the Central Valley, where many such | |
|----------|----|---|--------------------|
| | 2 | children have inhalers, and Merced County, the | |
| | 3 | most polluted county in the nation. We in the | PH-SJ045-1 cont |
| | 4 | Central Valley ask, how can this not be done? | |
| | 5 | Presently for those of us living in the | |
| | 6 | Central Valley, it took over 30 years for one UC | |
| | 7 | campus to be built. We do not have the luxury | |
| 1 | 8 | and time to wait for a public transportation | |
| | 9 | system which addresses the air quality problems | |
| | 10 | in the present versus more time to study other | |
| | 11 | routes, as some of the critics of EIR have | |
| | 12 | advocated. Thank you. | |
| | 13 | MR. PETRILLO: Thank you very much. We | |
| | 14 | will take our five-minute break. | |
| | 15 | (Break taken.) | |
| | 16 | MR. PETRILLO: All right. We will begin | |
| | 17 | with Richard Mlynarik. | |
| PH-SJ046 | 18 | RICHARD MLYNARIK: All set. Good | |
| | 19 | afternoon. I would like to read to you from the | |
| | 20 | "Corridor Evaluation" prepared for you by your | PH-SJ046-1 |
| | 21 | own consultants delivered September, 1999, and I | |
| | 22 | quote, Overall, the Pacheco Pass option would | |
| | 23 | have more negative environmental impacts compared | |
| | 24 | with the Altamont Pass option. This option may | |
| | 25 | potentially affect low-income populations in | |
| | | i de la companya de | İ |

PH-SJ046-1 cont

| 1 | Morgan Hill and low-income populations from |
|----|---|
| 2 | Morgan Hill to San Jose. |
| 3 | There would be substantially more water |
| 4 | crossings associated with this alignment, |
| 5 | including 20 small streams between San Joaquin |
| 6 | River and Los Banos. It has the greatest impact |
| 7 | on the area of Gilroy, Morgan Hill, Chowchilla, |
| 8 | and Los Banos. This option also has a high |
| 9 | potential to directly or indirectly destroy |
| 10 | properties in Santa Clara. |
| 11 | Second of which, the San Luis State |
| 12 | Recreation Area and O'Neil Forebay may |
| 13 | potentially be affected by this option. There |
| 14 | will be visual disasters to these resources as |
| 15 | well as residential areas adjacent to the |
| 16 | alignment. |
| 17 | So what we have in the EIR is your |
| 18 | examining two alternatives. You threw away the |
| 19 | one before studying the environmental issues. |
| 20 | You threw away the one with the least |
| 21 | environmental impacts and put in what many people |
| 22 | regard as a "straw mat" to drive a new alignment |
| 23 | through a wilderness area, something which is |
| 24 | illegal. I put it to you that you do not have |
| 25 | alternatives in the EIR. |

BELL & MYERS, CSR, INC.

PH-SJ046-1 cont

| 1 | You have the Pacheco Pass alignment and |
|----|---|
| 2 | something that would be discarded to apparently |
| 3 | meet some idea of what the environmental process |
| 4 | requires. I submit to you that you do not have |
| 5 | an adequate study of feasible alternatives in |
| 6 | this Environmental Impact Report, and you will be |
| 7 | seeing people in court unless you are willing to |
| 8 | honestly and directly study the Altamont |
| 9 | alignment. |
| 10 | Once again, this is a study. This is not |
| 11 | to say which is best or which is worse. It's a |
| 12 | look at the cost, a look at the benefits, |
| 13 | environmental impacts; the same we did before in |
| 14 | 1999. |
| 15 | MR. PETRILLO: One question. Do you |
| 16 | believe that just by studying the Altamont |
| 17 | alternative, we have satisfied the alternative |
| 18 | requirement? |
| 19 | RICHARD MLYNARIK: Well, if you do that in |
| 20 | a more professional way than under which the |
| 21 | Authority operated in the last few years. |
| 22 | MR. PETRILLO: Just the Altamont is of |
| 23 | your opinion? If we study that, we've satisfied |
| 24 | the alternative? |
| 25 | RICHARD MLYNARIK: I think you're a lot |

BELL & MYERS, CSR, INC.

| Ŧ | closer to meeting the requirements of CEQA, and I |
|----|---|
| 2 | don't think you're in the same ballpark. |
| 3 | MR. PETRILLO: Todd Kennedy followed by |
| 4 | Jack Sturla. |
| 5 | MR. DIRIDON: Mr. Chairman, as Todd's |
| 6 | coming forward, we discussed this many, many |
| 7 | times in the past, the public doesn't know that |
| 8 | we can't willy-nilly add alternatives back into a |
| 9 | study once they've been excluded. We've excluded |
| 10 | hundreds and hundreds of alternatives. I can't |
| 11 | say I have, because I more recently am on the |
| 12 | Board. But in the other sessions, hundreds and |
| 13 | hundreds of alternatives were eliminated for |
| 14 | various reasons environmental, operational, or |
| 15 | whatever. |
| 16 | If we're told we have to study this by |
| 17 | the legislature or attorney general or an |
| 18 | authority such as that, then, of course, we can |
| 19 | add it back in. But for us to add it back in |
| 20 | opens Pandora's Box on a lot of other |
| 21 | alternatives. |
| 22 | Remember, you're here in San Jose. This |
| 23 | system goes 710 miles throughout the state, and |
| 24 | in every area there is concern about other |
| 25 | alternatives. |

| PH-SJ047 | 1 | TODD KENNEDY: Okay. Good afternoon, | |
|----------|----|---|------------|
| | 2 | ladies and gentlemen. Todd Kennedy, resident of | |
| | 3 | Gilroy. The reason I'm here today is just to | |
| | 4 | express my feelings about and also my concern | PH-SJ047-1 |
| | 5 | about the Pacheco Pass alternative. The reason | |
| | 6 | for that is because I'm associated with a ranch, | |
| | 7 | Ranch Los Orens(phonetic) on Pacheco Pass just | |
| 1 | 8 | before the summit. The alternative will allow | |
| | 9 | the rail the rail system to tunnel through | |
| | 10 | those mountains that goes right through the | |
| | 11 | ranch, which is currently privately own. Excuse | |
| | 12 | me. Sorry. | |
| | 13 | I have been going up to the ranch all my | |
| | 14 | life, you know, to experience it. It's very much | |
| | 15 | like Henry Coe Park, and I have been to Henry Coe | |
| | 16 | many times hiking, backpacking, many things like | |
| | 17 | that. The ranch is like that. It's a big | |
| | 18 | wilderness area. Different kinds of animals that | |
| | 19 | were described earlier in earlier presentations. | |
| | 20 | And also the other concern is that and | |
| | 21 | this is relates to based on a research study I've | PH-SJ047-2 |
| | 22 | done basically very brief. It looks like what | |
| | 23 | both the Henry Coe and the Pacheco routes are | |
| | 24 | going to require a great deal of tunneling going | |
| | 25 | through those mountains. If you're going to run | |

| 1 | a train 150 miles an hour, which, you know, is | |
|----|---|------------|
| 2 | roughly what I understand the trains are going to | PH-SJ047-2 |
| 3 | be running at, those tunnels tunnels versus | cont |
| 4 | the daylight will probably not work too well | |
| 5 | because of the pressure differences going into | |
| 6 | the tunnel and then leaving the tunnel opening up | |
| 7 | to daylight, which means you could probably have | |
| 8 | significant damage done to the trains. Things | |
| 9 | like that. | |
| 10 | I have looked it over. I've read about | |
| 11 | it. And I can get you the information if you | PH-SJ047-3 |
| 12 | would like me to. I can even see if I can | |
| 13 | confirm that. | |
| 14 | So that means which leads me to | |
| 15 | believe, the Altamont Pass should be studied more | |
| 16 | in depth to see if less tunneling would be | |
| 17 | needed. Which means if you run a 150 mile an | |
| 18 | hour train through the Altamont Pass, you can | |
| 19 | bump it down to 110, 120 versus Pacheco or Henry | |
| 20 | Coe or Hamilton Pass route. Because then you | |
| 21 | have to bump it down to 100 miles an hour or less | |
| 22 | to run it through safely through those tunnels. | |
| 23 | And also the amount of money it would | |
| 24 | take to build those tunnels. From a financial | |
| 25 | view point, according to this document right | |

ANNO THE CALIFORNIA HIGH SPEED RAIL AUTHORITY

BELL & MYERS, CSR, INC.

PH-SJ047-3 cont

| 1 | here, it would take between 720 million to 2 |
|----|---|
| 2 | billion dollars to build the Altamont route due |
| 3 | to the tunneling costs and things like that. |
| 4 | So that's basically the point I want to |
| 5 | bring up about my feelings about Pacheco and the |
| 6 | Diablo route, because both are areas that should |
| 7 | be preserved as much as possible. So that's very |
| 8 | much just what I want to share, and I want to say |
| 9 | thank you for your time. Thank you. |
| 10 | MR. PETRILLO: Thank you. If you have |
| 11 | that information on the damage that occurs in |
| 12 | tunnels, because all of the information that I $^{'}$ |
| 13 | have received indicates that these trains go |
| 14 | through tunnels all over the world without that |
| 15 | damage. So if you've got some information, we |
| 16 | would appreciate you giving it to us. |
| 17 | Jack Sturla followed by William Garbett. |
| 18 | MR. DIRIDON: As Jack comes forward, we |
| 19 | have been advised by the tunnel experts in the |
| 20 | world. It's interesting to know probably the |
| 21 | most pristine fragile area in the world is the |
| 22 | Swiss and Italian Alps, which was a half dozen |
| 23 | tunnels going under them up to 30 kilometers long |
| 24 | and they're constructed for the use of high-speed |
| 25 | trains. One is being constructed now for |
| | |

BELL & MYERS, CSR, INC.

CALIFORNIA HIGH SPEED RAIL AUTHORITY

PH-SJ048-1

| | 1 | high-speed trains 190 miles an hour. |
|----------|----|---|
| PH-SJ048 | 2 | JACK STURLA: My name a Jack Sturla. I |
| | 3 | live in Gilroy on Holsclaw Road, which is two |
| | 4 | miles east of Gilroy along Llagas Creek. I have |
| | 5 | a few suggestions. I believe there haven't been |
| | 6 | enough meetings that the people in the rural |
| | 7 | areas that are going to be affected by the |
| ı | 8 | construction have had a chance to hear the |
| | 9 | proposal and study the routes, how it affects |
| | 10 | them. |
| | 11 | Right now one of the alternate routes |
| | 12 | chosen, the Pacheco route, coming into the valley |
| | 13 | leads to Gilroy, comes up, crosses the Llagas |
| | 14 | Creek right down the road from where I live and |
| | 15 | then goes into the farm land on the other side |
| | 16 | and bypasses Gilroy. |
| | 17 | Well, in reading the Mercury it had |
| | 18 | stated that there's 200 feet of right-of-way on |
| | 19 | either side. That's 400 feet if that's correct. |
| | 20 | That's a hell of a swath through agricultural |
| | 21 | land, and it's going to affect people's homes. |
| | 22 | Some of them probably have to be torn down, |
| | 23 | removed. |
| | 24 | The other thing or few one other thing |
| | 25 | is I wonder what the affect is would be on the |

BELL & MYERS, CSR, INC.

| | 1 | working cattle ranches in the Pacheco Valley | |
|----------|----|---|--------------------|
| | 2 | along the Pacheco Pass. | PH-SJ048-1 cont |
| | 3 | Also the affect in the wetlands north of | |
| | 4 | Los Banos. I happen to be an owner/member of a | |
| | 5 | duck club that lies due west of the San Luis Wild | |
| | 6 | Life Refuge. Reading again in the Mercury today | |
| | 7 | that the route was going to go through the | |
| ı | 8 | refuge, and it would affect a thousand acres more | |
| | 9 | outside of the refuge. My duck club is right | |
| | 10 | opposite the refuge, so I'm wondering about that. | |
| | 11 | As you probably know, the grassland and | |
| | 12 | ecological area is the largest single wetland | |
| | 13 | area left in the state and you should be very | |
| | 14 | careful what you propose through there. And I | |
| | 15 | believe that if you try to go through the | |
| | 16 | wetlands, you're going to hit a bee hive of | |
| | 17 | opposition. | |
| | 18 | Anyway, I think that's about it and thank | |
| | 19 | you for your time. | |
| | 20 | MR. PETRILLO: Thank you very much. | |
| | 21 | William Garbett followed by Scott Irby. | |
| PH-SJ049 | 22 | WILLIAM GARBETT: I'm William J. Garbett | PH-SJ049-1 |
| | 23 | speaking on behalf of the public. | |
| | 24 | When you look at this, you have to go | |
| | 25 | back to your original designation for high-speed | |
| | | | |

| 1 | rail, the connection between Northern California | 1 |
|-----|---|-------------------|
| 2 | and Southern California. Where are the locations | PH-SJ049- cont |
| 3 | of Southern California and Northern California? | |
| 4 | Well, it changes with time. We have a | |
| 5 | demographic shift. | |
| 6 | Here we have great life in the suburbs | |
| 7 | here, and San Jose is the capital of Silicon | |
| 8 | Valley with dot coms and every one is moving over | |
| 9 | to Los Banos, Tracy, Modesto, even down in | |
| 10 | Sacramento. | |
| 11 | So we don't know where that area is, but | |
| 12 | you need to find the demographic center in the | |
| 13 | future where the rail will be completed. | |
| L 4 | And to be a high-speed rail, it should | |
| L5 | have only two stops; one at each end and nowhere | |
| 16 | in between. Sort of like when Highway 5 was | |
| L7 | built; a straight shot down the middle of the | |
| 18 | state. Then people found their way at either end | |
| L9 | of that highway miraculously. That's the way | |
| 20 | high-speed rail should be looked at. | |
| 21 | You need to consider the alternatives. | |
| 22 | For instance, how much infrastructure and | |
| 23 | maintenance to you need on this? What is your | |
| 24 | competition? | |
| 25 | And you have to look at other | PH_S1049_2 |

| 1 | alternatives, such as, the gray hound race track. | |
|----|---|--------------------|
| 2 | A high-speed rail, if you're going to go through | PH-SJ049-2 cont |
| 3 | mountains with tunnels that are fragile, | |
| 4 | earthquakes, faults. Irregardless of any | |
| 5 | sabotage under the national security, Home Land | |
| 6 | Security basis, you're going to have to do like a | |
| 7 | gray hound race track where the dogs are racing. | |
| 8 | You need a little rabbit to go out in front to | |
| 9 | tell it's safe for the dogs to chase behind. | |
| 10 | You're going to have to clear the path. | |
| 11 | You're also going to have to look at the | |
| 12 | high-speed herbal(sic) that goes as a shock wave | |
| 13 | around this train. How is this air going to the | |
| 14 | side going to knock over the vegetation on the | |
| 15 | sides of the rail? Is it going to go and knock | |
| 16 | things up? | |
| 17 | As you go through these tunnels, the | |
| 18 | popping of the ears is going to be common. It is | |
| 19 | going to be worse than on an aircraft of going up | PH-SJ049-2 cont |
| 20 | and down and going through storms unless you | com |
| 21 | actually seal all the passenger compartments, in | |
| 22 | which case you have yet another problem. | |
| 23 | These are some of the things you need to | |
| 24 | look at that you haven't looked at. You also | PH-SJ049-3 |
| 25 | need to look at alternatives; such as, who's | |
| | | |

| 1 | going to ride the dog-gone thing? With the | 1 |
|----|---|--------------------|
| 2 | prices that you're anticipating, with all the | PH-SJ049-3 cont |
| 3 | tunnel construction and everything else, there's | |
| 4 | no way anyone can afford to ride it. | |
| 5 | What if the public accepts this? You | |
| 6 | actually need to get the ticket cost down to | |
| 7 | alternatives. People look at three different | |
| 8 | alternatives. | |
| 9 | Number one, their time constraints. So | |
| 10 | high-speed rail will actually be competitive with | |
| 11 | airlines and any other transportation media. | |
| 12 | Price. It has to be within the realm of 5 | |
| 13 | reason. | |
| 14 | MR. PETRILLO: Excuse me. You're going | |
| 15 | over your three minutes. | |
| 16 | WILLIAM GARBETT: Let me finish. It is | |
| 17 | the convenience of people. Are they going to be | |
| 18 | frisked down? Are they going to be hassled with | |
| 19 | baggage, or can they merely buy a ticket or pay a | PH-SJ049-3 |
| 20 | fare, such as, getting on a bus without a hassle, | cont |
| 21 | without body cavity searches, without their | |
| 22 | bodies being ransacked? Can people get on and | |
| 23 | off? | |
| 24 | When you solve these problems, you will | |
| 25 | have a ridership. Until then it's nothing more | |

CALEDDAIA HIGH SPEED BAH ALTHORITY

BELL & MYERS, CSR, INC.

| | 1 | than shall we say a route that Rod Diridon's | PH-SJ049-3 |
|----------|-----|---|------------|
| | 2 | MR. PETRILLO: Scott Irby followed by | |
| | 3 | Laura Stuchimsky. | |
| PH-SJ050 | 4 | SCOTT IRBY: Thank you very much. My name | |
| | 5 | is Scott Irby, and I live in San Jose and have | |
| | 6 | seen these articles about the plan. I had a | |
| | 7 | couple comments. | |
| 1 | 8 | One that I left you was exactly I | |
| | 9 | don't think it's in the EIR. But it's supposed | |
| | 10 | to be or not, I haven't seen any mention or | |
| | 11 | discussion of the infrastructure that's going to | PH-SJ050-1 |
| | 12 | support this system, power plants, and so forth. | |
| | 13 | Rod talks about the fact he drives a | |
| | 14 | electric car. That's good, but the pollution | |
| | 15 | from the power plant that powers the electric car | |
| | 16 | is somewhere. He doesn't get pollution-free from | |
| | 17 | an electric automobile. | |
| | 18 | And the system you're proposing is going | |
| | 19 | to be electric powered, we've had enough trouble | |
| | 20 | in this state to build enough power plants and | |
| | 21 | refineries. I'm not sure where you're going to | |
| | 22 | put the power plants. And if anybody has | |
| | 23 | followed as Rod has, the controversy about | |
| | 24 | Metcalf Power Plant off of Monterey Road and how | |
| | 2.5 | long that's taken to get built, you're going to | |

| 1 | have to go through this whole process with all | |
|----|---|------------|
| 2 | those power plants. | PH-SJ050-1 |
| 3 | And I don't think there's mention of | |
| 4 | those or the overhead wire, the transmission | |
| 5 | lines, the boost transformers, the boost | |
| 6 | substations, the whole line that can support | |
| 7 | this. Perhaps you can address that and answer my | |
| 8 | question, What is the system going to be using? | |
| 9 | Is it going to be powered by the existing grid or | |
| 10 | are you going to build a separate grid to support | |
| 11 | the power of the high-speed rail system? | |
| 12 | With respect to Ron's dream of the light | |
| 13 | rail in the valley, it's fine for part of the | |
| 14 | system. But the city couldn't decide whether to | PH-SJ050-2 |
| 15 | make a trolly loop downtown or run a commute | |
| 16 | service. And it's kind of a hodge podge of both. | |
| 17 | Once you're south of downtown, it's great. And | |
| 18 | once you're downtown, it's one or two miles an | 1 |
| 19 | hour. | : |
| 20 | People address this issue of being a | |
| 21 | commute service from the valley to here or | |
| 22 | high-speed rail service. I think in Europe or | |
| 23 | Japan, it's a high-speed between major cities; | |
| 24 | not jump off between Tracy and here or Los Banos | |
| 25 | and here or whatever. That's not the purpose. I | |

PH-SJ050-3

| 1 | don't think it's going to work. |
|----|---|
| 2 | With respect to the Altamont Pass line, |
| 3 | I'm sorry that you've dropped it. I think it |
| 4 | should be reconsidered. The only problem I would |
| 5 | have is what are you going about running through |
| 6 | Niles Canyon which has not be addressed because |
| 7 | that's a tenuous route that the ACE train takes. |
| 8 | With respect to the issue of |
| 9 | environmentalists that have spoken up, we have |
| 10 | more than enough difficulties with them |
| 11 | complaining with respect to the BART extension to |
| 12 | the airport. Got to stop now. We found a dead $^{^4}$ |
| 13 | snake. What kind of dead snake is it. Or some |
| 14 | butterfly or flower. That costs money, and |
| 15 | somebody has to pay the freight for that. And |
| 16 | every delay is a problem. |
| 17 | I don't know what environmental groups |
| 18 | think about that, but they don't recognize their |
| 19 | own interests. They're more interested in the |
| 20 | plants or trees surviving. And we have to draw a |
| 21 | line somewhere and say, sorry. We're not going |
| 22 | to do that. We're going to run through. Or |
| 23 | you're just wasting the tax payer's money. |
| 24 | MR. PETRILLO: You're over |
| 25 | SCOTT IRBY: Or 2015 or 2075 or 2100 |

BELL & MYERS, CSR, INC.

| 1 | before it's finished. I guess that's all my | PH-SJ050-3 |
|----|--|------------|
| 2 | comments. | COIR |
| 3 | Is there something in there about the | PH-SJ050-4 |
| 4 | power plants infrastructure or not in the EIR? | |
| 5 | MR. DIRIDON: I think we have to defer to | |
| 6 | the staff. | |
| 7 | MR. PETRILLO: They've all gone. | |
| 8 | MR. DIRIDON: Dan and Kerri are in the | |
| 9 | back of the room. They will answer your question | |
| 10 | in the response to all of the testimony. But | |
| 11 | rather than me guess, I think | |
| 12 | SCOTT IRBY: My address is up there on the $^{\circ}$ | |
| 13 | sheet, so if somebody wants to respond to me. | |
| 14 | MR. DIRIDON: the gentlemen is in the | |
| 15 | back of the room if you would like to talk to | |
| 16 | him. | |
| 17 | SCOTT IRBY: Just curious because I didn't | |
| 18 | see it. This is the first meeting I've come to | |
| 19 | about this project. So find a way so it makes it | |
| 20 | easier. | |
| 21 | MR. DIRIDON: Thank you. | |
| 22 | SCOTT IRBY: Thanks again. And I don't | |
| 23 | know if I'll be around long enough to ride it | |
| 24 | when it gets built, but I think Altamont Pass is | PH-SJ050-5 |
| 25 | more practical. The Niles Canyon route is slow. | |
| | 1 | |

| | 1 | If anybody has ridden through it, it goes about | PH-SJ050-5 |
|----------|----|---|------------|
| | 2 | 15 for 20 miles an hour. It's not going to go in | cont |
| | 3 | the Niles Canyon. | |
| | 4 | And risk of tunnels things and somebody | |
| | 5 | else mentioned, I think Europeans have answered | |
| | 6 | very successfully. And especially the French | PH-SJ050-6 |
| | 7 | train, which goes 187 miles an hour or whatever | |
| n. | 8 | the speed it is. There's little damage | |
| | 9 | immediately across the track. | |
| | 10 | MR. PETRILLO: Thank you. | |
| | 11 | SCOTT IRBY: Thank you very much. | |
| | 12 | MR. PETRILLO: Laura Stuchimsky followed | |
| | 13 | by Gerald Merrill. | |
| PH-SJ051 | 14 | LAURA STUCHIMSKY: Good afternoon. Thank | |
| | 15 | you. My name is Laura Stuchimsky, and I speak on | |
| | 16 | behalf of Silicon Valley Manufacturing Group. As | |
| | 17 | stated earlier by Carl Guardino, our organization | PH-SJ051-1 |
| | 18 | supports the construction of a high-speed rail | |
| | 19 | line connecting Northern and Southern California. | |
| | 20 | Such a line would be of enormous benefit for | |
| | 21 | those in California as well as visitors all | |
| | 22 | helping to preserve our environment. | |
| | 23 | We realize a project of this scale will | |
| | 24 | have an impact on the environment. It's | PH-SJ051-2 |
| | 25 | essential we choose a route that minimizes impact | |
| | | | |

| | | · · | |
|----------|----|---|------------|
| | 1 | but the line must also maximize the line's | |
| | 2 | operational efficiencies. It is essential for to | |
| | 3 | provide a line to entice Silicon Valley residents | PH-SJ051-2 |
| | 4 | and workers to use rail rather than cars or jump | |
| | 5 | on a plane. The high-speed rail needs to provide | |
| | 6 | fast and frequent service to Southern California. | |
| | 7 | The only way to accomplish this is | |
| 1 | 8 | through a southern alignment. A southern route | |
| | 9 | offers the best combination of frequency, speed, | |
| · | 10 | and ridership and consequently revenue for the | |
| | 11 | high-speed rail line far greater than the | |
| | 12 | Altamont Pass. At the same time, the Altamont | |
| | 13 | Pass posses environmental hurdles that are at | |
| | 14 | least insignificant as opposed to those by the | |
| | 15 | southern routes. | |
| | 16 | We employed your leadership on this | |
| | 17 | important project and look forward to seeing it | : |
| | 18 | move forward. Thank you for considering our | |
| | 19 | views. | |
| | 20 | MR. PETRILLO: Thank you very much. | |
| | 21 | Gerald Merrill and followed by Walter Strakosch. | |
| PH-SJ052 | 22 | GERALD MERRILL: My name is Gerald | PH-SJ052-1 |
| | 23 | Merrill. I am a hiker. This spring I went once | |
| | 24 | again to the park. And upon coming out after a | |
| | 25 | week, I discovered a little brochure. I've also | |
| | | | |

PH-SJ052-1 cont

| 1 | been a supporter of high-speed rail for many |
|-----|---|
| 2 | years. And I had always assumed that the |
| 3 | high-speed rail which I looked forward to riding |
| 4 | some day would go through the Altamont Pass. |
| 5 | I can't express to you the horror and |
| 6 | anger I felt in discovering that a public body |
| 7 | would consider much less make a proposal to put a |
| 8 | rail rock line through a wilderness area. The |
| 9 . | people of California have spoken very clearly |
| LO | about the value of wilderness areas to the people |
| 11 | of California. |
| 12 | I live in Oakland. It takes me about an $^{^{\circ}}$ |
| 13 | hour and 20 minutes from the door until I have |
| 1.4 | got my backpack on and I'm going down the trail. |
| 15 | That means the whole Bay Area is within a maximum |
| 16 | of two hours from a wilderness area. A |
| 1.7 | wilderness area is a sacred trust. It would be |
| .8 | like building a train through a cathedral to put |
| 19 | a train in that space. |
| 20 | Please don't. That must come off the |
| 21 | table. I had always assumed it would be Altamont |
| 22 | Pass. It seems so obvious. Perhaps not. But |
| 23 | first of all, not the wilderness area and please |
| 24 | relook at the Altamont Pass. It just seems to be |
| 5 | logical Thank you |

BELL & MYERS, CSR, INC.

| | 1 | MR. PETRILLO: Thank you. Walter | |
|----------|-----|---|------------|
| | 2 | Strakosch followed by Kenneth Mackay. | |
| PH-SJ053 | 3 | WALTER STRAKOSCH: Yes. My name is Walter | |
| | 4 | Strakosch. I'm retired from a 40-year career in | D. |
| | 5 | transportation including part of it in | PH-SJ053-1 |
| | . 6 | railroading. | |
| | 7 | The purpose and need for a high-speed | |
| | 8 | rail system in California is stated in Paragraph | |
| • | 9 | S3 of the summary section of the draft EIR, EIS. | |
| | 10 | Among other things it says, "The system needs to | |
| | 11 | be practicable and feasible as well as | |
| | 12 | economically viable. The system should maximize | |
| | 13 | the use of existing transportation corridors and | |
| | 14 | right-of-ways and be implemented in phases | |
| | 15 | completed by 2020." | |
| | 16 | The choice of the Pacheco Pass, or | |
| | 17 | southern routes, over the Altamont Pass knocks | |
| | 18 | that premise right out of the water. | |
| | 19 | They are presently two existing | |
| | 20 | right-of-ways from Bakersfield to Sacramento, | |
| | 21 | which could be used by high-speed rail along with | |
| | 22 | the existing railroads. There also exists from a | |
| | 23 | point where high-speed rail would leave San | |
| | 24 | Joaquin Valley for San Francisco via Altamont | |
| | 25 | Pass to existing right-of-ways. | |

PH-SJ053-1 cont

| 1 | One of these is the active UP |
|----|---|
| 2 | right-of-way, and the other abandoned southern |
| 3 | Pacific right-of-way. In both cases they were |
| 4 | built over a hundred years ago and crooked. But |
| 5 | with today's tools of technology, I believe they |
| 6 | could be improved, straightened, and brought to |
| 7 | high-speed rail standards. |
| 8 | I would also bet that since the UP line |
| 9 | is the secondary line, that sees two freight and |
| 10 | six passenger trains a day that it could be |
| 11 | picked up cheaply from the UP and at much less |
| 12 | than the 2 billion dollar cost of the southern |
| 13 | routing. |
| 14 | The southern routing is now anointed it |
| 15 | appears and in my opinion a poor choice. Simply |
| 16 | put the southern routing will cost 2 billion |
| 17 | dollars more and require over 100 miles of new |
| 18 | right-of-way over virgin and in some cases |
| 19 | sensitive environmental territory. In my opinion |
| 20 | it does nothing, and in fact detours total |
| 21 | ridership. |
| 22 | The largest intercity travel market in |
| 23 | the state is between the Central Valley and other |
| 24 | major metropolitan areas. The second is between |
| 25 | LA and San Diego. The third highest is between |

BELL & MYERS, CSR, INC.

| | 1 | Sacramento and San Francisco. And the next is | |
|----------|----|---|--------------------|
| | 2 | between LA and San Francisco. | DII CIOCO I |
| | 3 | The Pacheco Pass ignores Sacramento/ San | PH-SJ053-1 cont |
| | 4 | Francisco routing and eliminates medium haul | |
| | 5 | traffic and also traffic that can be diverted | |
| | 6 | from between San Francisco in the San Francisco | |
| | 7 | International Airport and Stockton, Modesto, and | |
| . 1 | 8 | Merced. With the pressure on San Francisco | |
| | 9 | International to make the best use of take-off | |
| | 10 | and landing slots by eliminating short haul | |
| | 11 | flights, this could also be a significant issue. | |
| | 12 | Thank you. | |
| | 13 | MR. PETRILLO: Kenneth Mackay. | |
| PH-SJ054 | 14 | KENNETH MACKAY: Thank you for letting me | |
| | 15 | speak. My name is Kenneth Mackay. I'm a | |
| | 16 | resident of San Jose and property owner in the | PH-SJ054-1 |
| | 17 | area near the Orestimba Wilderness. My | |
| | 18 | understanding of an EIR hearing is to consider | |
| | 19 | the adequacy of the EIR as it's presented. The | |
| | 20 | EIR is supposed to consider the pros and cons of | |
| | 21 | the reasonable alternatives. | |
| | 22 | As I understand from one of earlier | |
| | 23 | speakers, the Altamont Pass was rejected by the | |
| | 24 | Authority for because it would reduce the | |
| | 25 | ridership by about five percent over the southern | |

| 1 | alternatives. But by law the EIR is supposed to | 1 |
|----|---|--------------------|
| 2 | consider the no-project area which would reduce | |
| 3 | the ridership by a hundred percent. So the EIR | PH-SJ054-1 |
| 4 | is inadequate in that it doesn't consider the | |
| 5 | Altamont Pass alternative. | |
| 6 | The Chairman mentioned that some of the | |
| 7 | environmental groups are in favor of the Pacheco | |
| 8 | Pass route from the stuff brought in the hall. | |
| 9 | They are in favor of the Pacheco Pass route, | |
| 10 | because it's the best of a bad lot. And if the | |
| 11 | Altamont Pass were on the table, they would | |
| 12 | also they would be in favor of that one. | |
| 13 | MR. PETRILLO: If I were to comment on | |
| 14 | what I heard here today, all of the routes are | |
| 15 | considered a bad lot including Altamont. We're | |
| 16 | going to have a tough time making a decision. | |
| 17 | KENNETH MACKAY: Well, we don't know what | |
| 18 | the Altamont Pass route would be, because there's | PH-SJ054-1 cont |
| 19 | nothing discussed about it in the EIR. | |
| 20 | MR. DIRIDON: That's not true. | |
| 21 | MR. PETRILLO: Not exactly true, and | |
| 22 | people have opposed the Coe based upon policy | |
| 23 | reasons. And you could | |
| 24 | KENNETH MACKAY: And legal reasons. | |
| 25 | MR. PETRILLO: The Henry Coe. And I'm | |
| | | |

| 1 | saying it's not particularly relevant what's | |
|----|---|------------|
| 2 | discussed in there. What I'm saying, what I've | |
| 3 | heard tonight is that there have been serious | |
| 4 | objections to every alternative including the | |
| 5 | Altamont alternative. I know you support the | |
| 6 | Altamont alternative, but there are others that | |
| 7 | to not. That's all I'm saying. | |
| 8 | KENNETH MACKAY: I understand that, but | |
| 9 | the one thing about the EIR is that the three of | PH-SJ054-2 |
| 10 | the northern the northern alternatives and the | |
| 11 | southern group are all environmentally sensitive | |
| 12 | areas. They do, as other speakers have | |
| 13 | mentioned, are home to all sorts of endangered | |
| 14 | species. I have been there over the last 25 | |
| 15 | years many times, and it's an area that would be | |
| 16 | destroyed by this if the train went through | |
| 17 | there. | |
| 18 | The other speakers have mentioned that | |
| 19 | the state law would have to be amended or | |
| 20 | repealed, and it would have to be amended or | |
| 21 | repealed if the Coe alternative was considered, | |
| 22 | which would cause a lot of which would be | |
| 23 | difficult for the Authority to get past I'm sure. | |
| 24 | Anyhow, thank you for your time. | |
| 25 | MR. PETRILLO: Thank you. That was the | |

| _ | rase commenc. Thank you are for coming. As i |
|-----|--|
| 2 | said, we have our work cut out for us given the |
| 3 | comments today. And, however, we will try to do |
| 4 | the best we can, and I thank you all for your |
| 5 | input. |
| 6 | MR. DIRIDON: Mr. Chairman, may I thank |
| 7 | you and the Board for coming to San Jose today |
| 8 | and being available to the public in our area to |
| 9 | hear the testimony that you've received. Thank |
| 10 | you. |
| 11 | (Whereupon, the hearing was concluded at |
| 12 | 4:15 p.m.) |
| 1,3 | |
| 14 | |
| 15 | |
| 16 | • |
| 17 | |
| 18 | |
| 19 | |
| 20 | |

| 6 | I, LISA M. HELGOE, CSR No. 12216, HEREBY |
| 7 | CERTIFY: That I was the duly appointed, |
| 8 | qualified shorthand reporter in the |
| 9 | above-entitled action taken on the above-entitled |
| 10 | date; that I reported the same in machine |
| 11 | shorthand and thereafter had the same transcribed |
| 12 | through computer-aided transcription as herein |
| 13 | appears; and that the foregoing typewritten pages |
| 14 | contain a true and correct transcript of the |
| 15 | proceedings had in said matter at said time and |
| 16 | place to the best of my ability. |
| 17 | DATED: |
